PROFILE

Full Stack Javascript & Typescript Developer, seeking full time or part time, remote employment.

EXPERIENCE

FULL STACK DEVELOPER

2020 - PRESENT

Sodalite Games | Remote

- Built out a suite of full stack software solutions surrounding an upcoming tabletop role-playing game, including a large-scale app to manage character and campaign sheets.
- Utilized a tech stack of React/Redux on the front end, and Node/Express and MongoDB on the backend.
- Built and manage a MongoDB database and several Node/Express APIs.
- Built several front end applications and a website for users and admins .

FRONT END DEVELOPER

2021 - 2022

Extron Electronics | Remote in Raleigh, NC

- Worked on a team of engineers utilizing Agile/Scrum methodology.
- Updated and maintained an Angular component library of over 70+ highly reusable components, used by dozens of internal engineering teams working on their own software solutions.
- Worked with consumers of library to plan and add necessary features and assist in inner-source development.

WEB DEVELOPER

2019 - 2021

Botanicals, Inc. | Remote

- Singlehandedly built and managed 5 websites/applications to fulfill various business needs, including informational sites, catalogs, and subscriptions sites
- Utilized a tech stack of mainly React, NextJS, and Netlify CMS.
- Connected to API's and third party applications to manage, save, and display data
- Assist company with any other tech based needs, such as domain management, hosting, and choosing technologies and services that best suit the needs of the business.
